"Ca2+/Calmodulin-dependent protein kinase II: identification of threonine-286 as the autophosphorylation site in the alpha subunit associated with the generation of Ca2+-independent activity.";
Proc. Natl. Acad. Sci. U.S.A. 85:637-644(1988).
--- FUNCTION: THIS KINASE MAY PLAY A ROLE IN NEUROTRANSMISSION.
--- CATALITIC ACTIVITY: ATP + protech. A DP + O-phosphoprotein.
--- CATALITIC ACTIVITY: Attophosphorylation of Thr-286 allows the kinase to switch from a calmodulin-dependent to a calmodulin-
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 independent state.
-1- SUBUNIT: COMPOSED OF FOUR DIFFERENT CHAINS: ALPHA, BETA, GAMMA,

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Ca2+/calmodulin-dependent protein kinase IV beta polypeptide - rat
Cispecies: Rattus sp. (rat)
Cispecies: Rattus sp. (rat)
Cispecies: Rattus sp. (rat)
Cispecies: Accession: 152637
Risakagami, H.; Kondo, H.
Brain Res. Mol. Brain Res. 19, 215-218, 1993
A.Title: Cloning and sequencing of a gene encoding the beta polypeptide of Ca2+/calmodul
A.Reference number: 152637; MUID:94018484; PMID:8412563
A.Accession: 152637
A.Accession: 152637
A.Status: preliminary; translated from GB/EMBL/DDBJ
A.Molecule type: mRNA
A.Residues: 1-502 CRES>
A.Cross-references: GB:S65840; MID:9425383; PIDN:AAB28372.1; PID:9425384
C.Superfamily: Ca2+/calmodulin-dependent protein kinase; protein kinase homology
C.Keywords: ATP; calmodulin binding
F:68-334/Domain: protein kinase ATP-binding motif

Advoin-light-chain kinase (EC 2.7.1.117) A - slime mold (Dictyostelium discoideum)
N.Alternate names: MCCKA (EC 2.7.1.117) A - slime mold (Dictyostelium discoideum)
C.Species: Dictyostellum discoideum
A.Title: Characterization and bacterial expression of the Dictyostellum myosin light
A.Title: Characterization and bacterial expression of the Dictyostellum myosin light

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ò
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Qγ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Qγ
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         RESULT 14
S68470
Ca2+/Calmodulin-dependent protein kinase (EC 2.7.1.123) II beta-3 - rat
Ci2pedies: Rattus norvegicus (Norway rat)
C; Decides: Rattus norvegicus (Norway rat)
C; Date: 17-Jul-1998 #sequence_revision 17-Jul-1998 #text_change 18-Jun-1999
C; Accession: S68470; I53501
R; Urquidi, V.; Ashcroft, S.J.H.
FEBS Lett. 358, 23-26, 1995
A; Title: A novel pancreatic beta-cell isoform of calcium/calmodulin-dependent protein ki
A; Reference number: I33501; MUID:95121451; PMID:7821422
A; Molecule type: mRNA
A; Residues: 1-589 cNRQ>
A; Molecule type: mRNA
A; Residues: 1-589 cNRQ>
A; Complex: heteromultiner composed of 10-12 chains (alpha, beta, gamma, delta) generally
C; Superfamily: Ca2+/calmodulin-dependent protein kinase II; protein kinase homology
C; Superfamily: Ca2+/calmodulin-dependent protein kinase II; protein kinase homology
C; Superfamily: Ca2+/calmodulin binding motif
F; 20-28/Region: protein kinase ATP-binding motif
F; 20-18/Region: protein kinase ATP-binding motif
F; 21.743,611,136,138/Active site: Lys, Glu, Asp, Lys #status predicted
F; 287,306/Binding site: phosphate (Thr) (covalent) (by autophosphorylation) #status predicted

Sequence 1, Application US/09817181

Patent No. US2020142427A1

GENERAL INFORMATION:

APPLICANT: MERKULOV, Gennady et al

TITLE OF INVENTION: ISOLATED HUMAN KINASE PROTEINS, NUCLEIC

TITLE OF INVENTION: ACID MOLECULES ENCODING HUMAN KINASE PROTEINS, AND USES

TITLE OF INVENTION: THEREOF

FILE REPERBENCE: CLOOL189

CURRENT APPLICATION NUMBER: US/09/817,181

CURRENT FILING DATE: 2001-03-27
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        396
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      323
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  456
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               383
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       443
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    576

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                            US-09-960-643-1
